Benefits

Proven

Clinical studies and real-world use over several decades have proven that laser therapy alleviates pain and inflammation, reduces swelling, and stimulates nerve regeneration and cells involved in tissue repair.

Improved patient outcomes

- Deep, soothing laser therapy provides a drug-free option for enhanced patient care.
- Effective relief of pain, inflammation, and swelling
- Extremely well tolerated by pets
- No known side effects when applied properly
- May decrease the need for surgery and medications
- Reduces healing time
- Requires no sedation or clipping
- Quick to administer (approximately 3 to 6 minutes per site)
- Pet owners can be present and participate in the healing process
